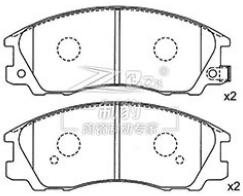
Hyundai Terracan,Ceramic Brake Pad,D1713,58101-H1A00,F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million



Product Specification

- Product Name: Hyundai Terracan Ceramic Brake Pad
- Model: Hyundai Terracan
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-28018
- F/R: F
- FMSI: D1713
- OEM: 58101-H1A00
- Braking System: MDO
- Highlight: **58101-h1a00 ceramic brake pad**, **58101-h1a00 ceramic brake pads**, **hyundai terracan ceramic brake pad**

Product Description

Specifications	
Product name	Hyundai Terracan Brake Pad
Model	Hyundai Terracan
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-28018
FMSI	D1713
OEM	58101-H1A00
Braking System	MDO
Size	
Width	148.85 mm
Height	57.95 mm
Thickness	16.7 mm
Model_MARKE	Hyundai Terracan/ Hyundai (Hawtai) Terracan/ Landwind X6, 2.0L, 2.8T, 2006~/ Landwind X9, 2.0T, 2.4L, 2008~/ Hawtai Terracan 2.5L, 2.9L, 3.5L, 2001/ SsangYong Actyon 2.0L, 2.3L, 2006~/ JAC Refine Xianghe 2.0T, 2.4L, 2007~/ Zotye T600 1.5T, 2.0T, 2013~

Front Brake Pads for Hyundai Terracan, model D1713, part number 58101-H1A00, are crafted with high OE compatibility materials for efficiency and durability during braking. These brake pads are suitable for Hyundai Terracan models produced between 2001 and 2006, including the 2.5 TD, 2.9 CRDi 4WD, and 3.5 i V6 4WD variants. Their precise dimensions and manufacturing process ensure a perfect fit with the original brake system, offering solid protection for your driving safety.
Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
