

Jeep 2014 Cherokee,Ceramic Brake Pad,D1734,68225301AA,R

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Jeep 2014 Cherokee Ceramic Brake Pad
- Model: Jeep 2014 Cherokee
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-14011
- F/R: R
- FMSI: D1734
- OEM: 68225301AA
- Braking System: N
- Highlight: **68225301aa ceramic brake pad,
68225301aa ceramic brake pads,
jeep 2014 ceramic brake pad**

Product Description

Specifications	
Product name	Jeep 2014 Cherokee Brake Pad
Model	Jeep 2014 Cherokee
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-14011
FMSI	D1734
OEM	68225301AA
Braking System	N
Size	
Width	115.6 mm
Height	49.5 mm
Thickness	16.5 mm
Model_MARKE	(2016 Jeep Renegade 1.4/ 2.0 post-D1809)

Rear Brake Pads for the 2014 Jeep Cherokee, model D1734, part number 68225301AA, are made with high-performance materials to ensure optimal response and durability during braking. These brake pads are specifically designed for the Jeep Cherokee, perfectly compatible with the original brake system, offering superior braking performance and extended lifespan. Whether navigating city streets or rugged mountain paths, they provide consistent and reliable braking power to ensure your safety on the road.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
