

2014 Mazda 2014 CX-5,Ceramic Brake Pad,D2111,R

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: 2014 Mazda 2014 CX-5 Ceramic Brake Pad
- Model: 2014 Mazda 2014 CX-5
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-20014
- F/R: R
- FMSI: D2111
- OEM: 68273005A1
- Braking System: N
- Highlight: **68273005a1 ceramic brake pad,**
68273005a1 ceramic brake pads

Product Description

Specifications	
Product name	2014 Mazda 2014 CX-5 Brake Pad
Model	2014 Mazda 2014 CX-5
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-20014
FMSI	D2111
OEM	68273005A1
Braking System	N
Size	
Width	91.6 mm
Height	47.5 mm
Thickness	14 mm
Model_MARKE	2016 Changan CS15/ Changan Oushang/ 2017 Oushang A800/ 2016 Lingxuan

Product Description:

Enhance the safety and performance of your 2014 Mazda CX-5 with our top-of-the-line **Ceramic Brake Pads (D2111)**. Designed for the rear brakes, these pads offer a perfect blend of durability and efficiency, ensuring a responsive braking experience.

Crafted from advanced ceramic materials, our brake pads provide superior stopping power with reduced noise and dust. This means a cleaner vehicle and a quieter ride. The part number **D2111** is your assurance of a precise fit and easy installation, specifically tailored for the rear ('R') brake assembly of your Mazda CX-5.

Key Features:

Exceptional stopping power for enhanced safety

Low dust formulation to keep your wheels clean

Quiet operation for a more pleasant driving experience

Exact fit with part number **D2111** for the rear brakes

Long-lasting ceramic construction for extended pad life

Whether you're commuting in the city or taking on adventurous drives, our Ceramic Brake Pads will provide the confidence and control you need. Upgrade your Mazda CX-5 with our Ceramic Brake Pads and experience the difference in braking quality and comfort!

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
