

2019 Nissan Sylphy HP69HFF Front Ceramic Brake Pads D2310

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: 2019 Nissan Sylphy Ceramic Brake Pad
- Model: 2019 Nissan Sylphy
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-22027
- F/R: F
- FMSI: D2310
- OEM: HP69HFF
- Braking System: N
- Highlight: 2019 Nissan Sylphy front ceramic brake pads,
2019 Nissan Sylphy ceramic brake pads,
HP69HFF

Product Description

Specifications	
Product name	2019 Nissan Sylphy Brake Pad
Model	2019 Nissan Sylphy
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-22027
FMSI	D2310
OEM	HP69HFF
Braking System	N
Size	
Width	141.6 mm
Height	55.9 mm
Thickness	15.9 mm
Model_MARKE	2019 Renault Captur

Elevate your journey with the 2019 Nissan Sylphy Front Brake Pads, part number HP69HFF. These premium quality brake pads are designed to provide your Nissan Sylphy with unmatched braking performance and durability. The part number D2310 signifies the precision engineering that goes into each set, ensuring a perfect fit and optimal function for your vehicle's front brakes. With these brake pads, you can expect a quieter, smoother ride and the confidence that comes with Nissan's commitment to safety and quality. Upgrade to these genuine Nissan brake pads and enjoy a superior driving experience with every stop.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
