

Volkswagen Santana Ceramic Volkswagen Brake Pad 171698151F Car Brake Pad

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Volkswagen Santana Ceramic Brake Pad
- Model: Volkswagen Santana
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-01006
- F/R: F
- FMSI: D280
- OEM: 171698151F
- Braking System: Volkswagen
- Highlight: **171698151F volkswagen brake pad,**
171698151F car brake pad,
Santana volkswagen brake pad

Product Description

Specifications	
Product name	Volkswagen Santana Brake Pad
Model	Volkswagen Santana
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-01006
FMSI	D280
OEM	171698151F
Braking System	Volkswagen
Size	
Width	137.9 mm
Height	49 mm
Thickness	14.2 mm
Model_MARKE	Santana Poussin (Old Model)/ B2 (-98)/ Old Jetta

Optimize your Volkswagen Santana's braking performance with the OEM Brake Pad Set, part number 171698151F. These high-quality brake pads are engineered to match the exacting standards of Volkswagen, ensuring a perfect fit and superior stopping power for your vehicle. The D280 model brake pads are designed for the front axle, providing reliable and consistent braking response in all driving conditions. With these genuine Volkswagen brake pads, you can expect reduced brake noise, minimal dust, and a longer lifespan, keeping your Santana running smoothly and safely. Trust in the precision and quality of Volkswagen Genuine Parts to maintain the integrity and performance of your beloved car.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
