

Citroën Fukang 1.6,Ceramic Brake Pad,D292,4250.41,F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Citroën Fukang 1.6 Ceramic Brake Pad
- Model: Citroën Fukang 1.6
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-26001
- F/R: F
- FMSI: D292
- OEM: 4250.41
- Braking System: GRL
- Highlight: **4250.41 ceramic brake pad,**
4250.41 ceramic brake pads

Product Description

Specifications	
Product name	Citroën Fukang 1.6 Brake Pad
Model	Citroën Fukang 1.6
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-26001
FMSI	D292
OEM	4250.41
Braking System	GRL
Size	
Width	100 mm
Height	63.5 mm
Thickness	18 mm
Model_MARKE	Citroën Fukang 988 (with ABS)/ Fukang 8V 1.6L/ Elysée 8V/ Picasso (transition model)/ Lifan 520/ Hafei M303 (new model)/ Hafei Saima/ Hafei Saibao

Citroën Fukang 1.6 Ceramic Brake Pads (D292, 4250.41, F) Upgrade your Citroën Fukang 1.6's braking performance with our premium ceramic brake pads. Our model D292 brake pads are designed to match OEM specifications, ensuring a perfect fit for your vehicle. The part number 4250.41 signifies our commitment to quality and compatibility with your Citroën model.

These brake pads are engineered to provide superior stopping power, reduced noise, and minimal dust, enhancing your driving experience. The high-quality ceramic material ensures long-lasting durability and consistent performance under various driving conditions. Whether you're navigating city streets or taking on the highways, our brake pads are built to deliver reliable safety.

Experience the difference with our ceramic brake pads and enjoy a smoother, quieter, and more responsive braking system in your Citroën Fukang 1.6.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
