

Kia Pride,Ceramic Brake Pad,D402,KK150-33-23Z,F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Kia Pride Ceramic Brake Pad
- Model: Kia Pride
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-21006
- F/R: F
- FMSI: D402
- OEM: KK150-33-23Z
- Braking System: Sumitomo
- Highlight: **kk150-33-23z ceramic brake pad,**
kk150-33-23z ceramic brake pads,
kia pride ceramic brake pad

Product Description

Specifications	
Product name	Kia Pride Brake Pad
Model	Kia Pride
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-21006
FMSI	D402
OEM	KK150-33-23Z
Braking System	Sumitomo
Size	
Width	78.8 mm
Height	63.4 mm
Thickness	13.5 mm
Model_MARKE	Kia Pride/ Mazda 121

Enhance Your Driving Experience with Premium Ceramic Brake Pads for Kia Pride

Upgrade your Kia Pride's braking system with our top-of-the-line ceramic brake pads. Our model D402 pads are designed to fit perfectly with the OEM part number KK150-33-23Z, ensuring a seamless installation process. Manufactured with advanced ceramic materials, these brake pads offer superior stopping power and a whisper-quiet operation, eliminating the screeching sounds commonly associated with worn-out brakes.

Key Features:

Exceptional Durability: Engineered for longevity, our brake pads withstand extensive use, providing reliable performance and reduced wear over time.

Reduced Brake Dust: Keep your wheels cleaner with our low-dust formula, minimizing the accumulation of unsightly brake residue.

Optimal Comfort: Experience smooth and responsive braking with minimal pedal effort, enhancing your overall driving comfort.

All-Weather Performance: Whether it's a sunny day or a rainy night, our brake pads deliver consistent stopping power in various weather conditions.

Specifications:

Width: 78.8 mm

Height: 63.4 mm

Thickness: 13.5 mm

Material: High-quality ceramic composite

Position: Front axle

Our ceramic brake pads are rigorously tested to meet stringent quality standards, ensuring that you receive a product that not only performs well but also contributes to the safety of your vehicle. With easy installation and a perfect fit for the Kia Pride, these brake pads are an ideal choice for drivers seeking performance and peace of mind.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them

environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels. Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
