

Mitsubishi Impreza,Ceramic Brake Pad,D460,41060-37P91,F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Mitsubishi Impreza Ceramic Brake Pad
- Model: Mitsubishi Impreza
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-24001
- F/R: F
- FMSI: D460
- OEM: 41060-37P91
- Braking System: SUM
- Highlight: mitsubishi ceramic brake pad,
mitsubishi ceramic brake pads,
sum ceramic brake pad

Product Description

Specifications	
Product name	Mitsubishi Impreza Brake Pad
Model	Mitsubishi Impreza
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-24001
FMSI	D460
OEM	41060-37P91
Braking System	SUM
Size	
Width	119.2 mm
Height	70.5 mm
Thickness	14.5 mm
Model_MARKE	Mitsubishi Impreza

Maximize Your Mitsubishi Impreza's Performance with Our Ceramic Brake Pads

Ensure your Mitsubishi Impreza stops as smoothly as it drives with our premium ceramic brake pads, model D460. Designed to match the original equipment part number 41060-37P91, these pads are engineered for a perfect fit and easy installation. Our ceramic formula provides a quieter, more responsive braking experience, reducing noise and enhancing comfort.

Key Features:

Superior Stopping Power: Experience reliable, consistent braking with our high-performance pads, which offer excellent stopping power without sacrificing quality.

Low Dust Emission: Keep your wheels looking clean with our low-dust technology, significantly reducing the buildup of unsightly brake dust.

Enhanced Durability: Benefit from a longer lifespan and less frequent replacements thanks to the robust ceramic material that withstands rigorous use.

All-Weather Reliability: Perform confidently in any weather condition, knowing your brake pads offer dependable performance rain or shine.

Specifications:

Length: 119.2 mm

Width: 69.8 mm

Thickness: 14.3 mm

Material: High-grade ceramic composite

Position: Front axle

Our ceramic brake pads are thoroughly tested to exceed industry standards, providing you with a product that not only improves your vehicle's safety but also its overall driving dynamics. Perfect for the Mitsubishi Impreza, these brake pads are an essential upgrade for any discerning driver.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we

ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
