

## Mitsubishi V33,Ceramic Brake Pad,D530,MB857837,F

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

#### Product Specification

- Product Name: Mitsubishi V33 Ceramic Brake Pad
- Model: Mitsubishi V33
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-23001
- F/R: F
- FMSI: D530
- OEM: MB857837
- Braking System: AKB
- Highlight: mitsubishi ceramic brake pad,  
mitsubishi ceramic brake pads

## Product Description

Specifications	
Product name	Mitsubishi V33 Brake Pad
Model	Mitsubishi V33
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-23001
FMSI	D530
OEM	MB857837
Braking System	AKB
Size	
Width	149.8 mm
Height	58.6 mm
Thickness	16 mm
Model_MARKE	Mitsubishi Outlander (2006)/ Changfeng Liebao V33/V43/ Pajero V33/ 6G72/ Hyundai Grandeur 3.0L (1992)

### Superior Stopping Power with D530 Ceramic Brake Pads for Mitsubishi V33

Upgrade your Mitsubishi V33 with our D530 ceramic brake pads, designed to replace the OEM part number MB857837 on the front axle. These brake pads are made from a high-quality ceramic composite that provides exceptional stopping power, reduced noise, and minimal dust production.

#### Key Features:

**Precision Fit:** Tailored for the Mitsubishi V33, ensuring a perfect match and easy installation.

**Quiet Braking:** Our ceramic material reduces braking noise, offering a more comfortable driving experience.

**Low Dust Emission:** Keep your wheels clean with our brake pads that produce less dust than traditional materials.

**Enhanced Durability:** Experience longer pad life and consistent performance under various driving conditions.

#### Specifications:

**Material:** Advanced ceramic composite

**Position:** Front axle

**Compatibility:** Designed for Mitsubishi V33 models requiring part number MB857837

Our D530 ceramic brake pads are the ideal choice for Mitsubishi V33 owners seeking a reliable and efficient braking solution. They are rigorously tested to meet the highest standards of quality and safety, providing peace of mind with every stop.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
