

Mitsubishi Lioncel,Ceramic Brake Pad,D534,MB699577,F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Mitsubishi Lioncel Ceramic Brake Pad
- Model: Mitsubishi Lioncel
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-23008
- F/R: F
- FMSI: D534
- OEM: MB699577
- Braking System: SUM
- Highlight: mitsubishi ceramic brake pad,
mitsubishi ceramic brake pads,
sum ceramic brake pad

Product Description

Specifications	
Product name	Mitsubishi Lioncel Brake Pad
Model	Mitsubishi Lioncel
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-23008
FMSI	D534
OEM	MB699577
Braking System	SUM
Size	
Width	127.8 mm
Height	48.2 mm
Thickness	15.4 mm
Model_MARKE	Soueast Lioncel 1.6 (New model)/ V3 Lingyue/ Domestic Lancer

Enhance Your Ride's Safety with Mitsubishi Lioncel Ceramic Brake Pads

Upgrade your Mitsubishi Lioncel's braking performance with our premium ceramic brake pads. Designed specifically for your vehicle, our brake pads offer a perfect fit for models requiring part number MB699577, and D534. Experience a significant improvement in stopping power with these high-quality ceramic pads that provide a quieter and cleaner operation compared to traditional materials.

Key Features:

Optimized Friction Formula: Tailored to deliver consistent stopping power while ensuring minimal wear on the rotor.

Low Dust Emission: Keep your wheels cleaner with our ceramic brake pads that produce less brake dust.

Reduced Noise: Engineered to reduce braking noise, offering a more comfortable and quiet ride.

Enhanced Durability: Resistant to high temperatures, our brake pads are built to last longer and perform reliably under various driving conditions.

Whether you're navigating city streets or taking on the open road, trust our Mitsubishi Lioncel Ceramic Brake Pads to provide you with the safety and performance you need.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
