

Honda 2.0 Ceramic Brake Pad D537 , 43022-SG0-G01 Rear Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Honda 2.0 Ceramic Brake Pad
- Model: Honda 2.0
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-07002
- F/R: R
- FMSI: D537
- OEM: 43022-SG0-G01
- Braking System: AKB
- Highlight: **Honda 2.0 rear brake pads,
Honda 2.0 ceramic brake pad,
43022-SG0-G01 rear brake pads**

Product Description

Specifications	
Product name	Honda 2.0 Brake Pad
Model	Honda 2.0
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-07002
FMSI	D537
OEM	43022-SG0-G01
Braking System	AKB
Size	
Width	88.7 mm
Height	47.5 mm
Thickness	14.6 mm
Model_MARKE	Pre-2008 Honda 2.4/ Honda CR-V/ 2007 BYD F6 (with independent handbrake)

Maximize Your Honda's Braking Efficiency with D537 Ceramic Brake Pads

Ensure your Honda 2.0 operates at peak safety with our D537 Ceramic Brake Pads, engineered to meet the exact specifications of part number 43022-SG0-G01. These rear-positioned brake pads are designed to enhance your vehicle's stopping power while providing a quieter and cleaner braking experience.

Product Highlights:

Precision Fit for Honda 2.0 Models: Tailored to match OEM standards for a seamless installation.

Advanced Ceramic Composition: Reduces brake dust and noise, ensuring a clean and silent operation.

Superior Stopping Power: Experience reliable braking performance in various driving conditions.

Long-Lasting Durability: Crafted to withstand high temperatures and reduce wear on brake rotors.

For drivers who demand excellence and longevity from their brake components, our D537 Ceramic Brake Pads are the ideal choice for maintaining the integrity of your Honda's braking system.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them

environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels. Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
