

## Nissan Bluebird Rear Brake Pads Ceramic Brake Pad D540 , 44060-31U92

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

#### Product Specification

- Product Name: Nissan Bluebird Ceramic Brake Pad
- Model: Nissan Bluebird
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-22003
- F/R: R
- FMSI: D540
- OEM: 44060-31U92
- Braking System: AKB
- Highlight: **Nissan Bluebird rear brake pads,  
Nissan Bluebird ceramic brake pad,  
44060-31U92 rear brake pads**

## Product Description

Specifications	
Product name	Nissan Bluebird Brake Pad
Model	Nissan Bluebird
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-22003
FMSI	D540
OEM	44060-31U92
Braking System	AKB
Size	
Width	105.25 mm
Height	46.8 mm
Thickness	15.8 mm
Model_MARKE	Nissan Cedric A32 2.0/3.0/ Bluebird (Old model)/ Bluebird U13 U12/ Guangzhou Leopard (front disc/rear disc)

### Optimized Braking Performance with Nissan Bluebird's D540 Ceramic Brake Pads

Elevate your Nissan Bluebird's braking system with our top-of-the-line D540 Ceramic Brake Pads. These pads are expertly crafted to match the specifications of part number 44060-31U92, ensuring a perfect fit and optimal performance for your vehicle's rear brakes.

#### Key Features:

**Precision Engineered:** Designed to meet the exacting standards of your Nissan Bluebird, providing a reliable and secure fit.

**Advanced Ceramic Material:** Offers superior stopping power, reduced brake dust, and quieter operation compared to standard pads.

**Enhanced Durability:** Resilient against high temperatures and wear, extending the lifespan of both the pads and the rotors.

**Improved Safety:** Delivers consistent braking force, improving your vehicle's safety on the road.

Whether you're commuting in the city or embarking on a long journey, our Nissan Bluebird Ceramic Brake Pads will ensure a smooth and responsive braking experience every time.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
