

Lexus LS400 UCF 10/20 Lexus Brake Pad D564 , 43022-ST3-E00 Front Ceramic Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Lexus LS400 UCF 10/20 Ceramic Brake Pad
- Model: Lexus LS400 UCF 10/20
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-17007
- F/R: F
- FMSI: D612
- OEM: 04465-50110
- Braking System: KHY
- Highlight: **43022-ST3-E00 lexus brake pad,**
Lexus LS400 front ceramic brake pads,
43022-ST3-E00 ceramic brake pads

Product Description

Specifications	
Product name	Lexus LS400 UCF 10/20 Brake Pad
Model	Lexus LS400 UCF 10/20
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-17007
FMSI	D612
OEM	04465-50110
Braking System	Sumitomo
Size	
Width	144 mm
Height	63.8 mm
Thickness	17.6 mm
Model_MARKE	Dodge Caravan 3.3L (96 model)/ Jiefang Small Van/ Chrysler LHS (94 model)/ Dodge Dynasty 3.5L/ Chrysler M3

Enhance Your Lexus LS400 UCF 10/20's Braking Performance with Premium Ceramic Brake Pads (D564, 43022-ST3-E00)

Ensure your Lexus LS400 UCF 10/20 stops as smoothly and efficiently as it runs with our top-grade ceramic brake pads. Our D564 model is engineered to match the exacting standards of your Lexus, providing a seamless fit and exceptional braking reliability. The part number 43022-ST3-E00 guarantees compatibility with your vehicle's sophisticated braking system. Crafted from advanced ceramic compounds, these brake pads offer a significant reduction in brake dust and noise, leading to a cleaner wheel surface and a more pleasant driving experience. Tested rigorously for safety and endurance, they deliver consistent performance and superior stopping power under various driving conditions. Whether navigating through city traffic or enjoying an open road, our ceramic brake pads give you the confidence of knowing your Lexus LS400 UCF 10/20 has the braking power to keep you safe and in control.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels. Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
