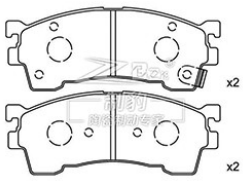
Mazda Fumilai,Ceramic Brake Pad,D637,CBY0-33-28Z,F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million



Product Specification

- Product Name: Mazda Fumilai Ceramic Brake Pad
- Model: Mazda Fumilai
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-20005
- F/R: F
- FMSI: D637
- OEM: CBY0-33-28Z
- Braking System: Sumitomo
- Highlight: **cby0-33-28z ceramic brake pad**, **cby0-33-28z ceramic brake pads**

Product Description

Specifications	
Product name	Mazda Fumilai Brake Pad
Model	Mazda Fumilai
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-20005
FMSI	D637
OEM	CBY0-33-28Z
Braking System	Sumitomo
Size	
Width	131.7 mm
Height	51.5 mm
Thickness	14.5 mm
Model_MARKE	Fumilai Second Generation/ Mazda 323/ Mazda 626

Mazda Fumilai Ceramic Brake Pads (D637, CBY0-33-28Z)
Elevate your Mazda Fumilai's braking experience with our advanced ceramic brake pads. Our D637 model is meticulously crafted to ensure a perfect match with your vehicle's specifications, providing unparalleled braking performance. The OEM part number CBY0-33-28Z signifies a direct fit, ensuring easy installation and optimal functionality.
Designed with the latest ceramic material technology, these brake pads offer a significant reduction in brake dust and noise, promoting a cleaner and quieter driving environment. They are engineered to deliver consistent stopping power and long-lasting wear, even in the most demanding driving conditions.
Invest in the safety and performance of your Mazda Fumilai with our ceramic brake pads, and enjoy a superior driving experience with every stop.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
