BMW 728/E38 Front Ceramic Brake Pads D639 34116761249 bmw brake pad

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: BMW 728/E38 Ceramic Brake Pad
- Model: BMW 728/E38
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-04016
- F/R: F
- FMSI: D639
- OEM: 34116761249
- Braking System: Bosch
- Highlight: **BMW 728/E38 front ceramic brake pads**, **34116761249 front ceramic brake pads**, **BMW front ceramic brake pads**

Product Description

Specifications	
Product name	BMW 728/E38 Brake Pad
Model	BMW 728/E38
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-04016
FMSI	D639
OEM	34116761249
Braking System	Bosch
Size	
Width	119.9 mm
Height	73.7 mm
Thickness	17 mm
Model_MARKE	Series 7 E38(1994-2001)

Optimize Your BMW 728/E38's Braking System with High-Quality Ceramic Brake Pads (D639, 34116761249)
Discover the ultimate braking solution for your BMW 728/E38 with our ceramic brake pads, model D639. These pads are engineered to provide a precise fit, matching OEM part number 34116761249, ensuring compatibility and superior performance.
Our ceramic brake pads are designed for longevity and crafted to produce minimal brake dust, keeping your wheels clean and maintaining optimal performance. The advanced ceramic formula reduces noise, offering a quiet and comfortable driving experience. With a focus on safety, our brake pads undergo stringent testing to exceed industry standards.
Experience enhanced stopping power, improved safety, and a quieter ride with our ceramic brake pads, the perfect upgrade for your BMW 728/E38.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
