Suzuki Jimny MPV, Ceramic Brake Pad, D660, 55110-70A00, F

Basic Information

- Place of Origin:
- Brand Name:
- Certification:
- Model Number:
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

• Product Name: Suzuki Jimny MPV Ceramic Brake Pad Model: Suzuki Jimny MPV Brake Pad • Type: Ceramic • Material: ZK-44002 • Factory No.: • F/R: F • FMSI: D660 55110-70A00 • OEM: • Braking System: SUM • Highlight: sum ceramic brake pad, sum ceramic brake pads

Specifications	
Product name	Suzuki Jimny MPV Brake Pad
Model	Suzuki Jimny MPV
Туре	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-44002
FMSI	D660
OEM	55110-70A00
Braking System	SUM
Size	
Width	110.3 mm
Height	41.7 mm
Thickness	15 mm
Model_MARKE	Suzuki Jimny MPV (1998/09-)/ Suzuki SJ410/ SJ413

Suzuki Jimny MPV Ceramic Brake Pads (D660, 55110-70A00)

Revitalize your Suzuki Jimny MPV's braking system with our exceptional ceramic brake pads, model D660. These pads are precision-engineered to fit seamlessly with your vehicle, aligning with the OEM part number 55110-70A00 for assured compatibility and performance.

Our ceramic brake pads are crafted from a high-quality ceramic compound that significantly reduces brake dust and noise, ensuring a cleaner and quieter driving experience. They provide consistent stopping power and are designed to withstand the rigors of daily driving, enhancing your safety and comfort on the road.

With a focus on quality and customer satisfaction, our brake pads undergo extensive testing to meet stringent industry standards. Choose our ceramic brake pads for your Suzuki Jimny MPV and experience a new level of braking confidence and control.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
