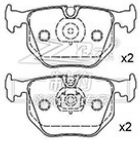
BMW X5/740 Ceramic Bmw X5 Front Brake Pads D683 , 34216761250

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million



Product Specification

- Product Name: BMW X5/740 Ceramic Brake Pad
- Model: BMW X5/740
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-04002
- F/R: F
- FMSI: D683
- OEM: 34216761250
- Braking System: ATE
- Highlight: **Ceramic bmw x5 front brake pads**, **34216761250 bmw x5 front brake pads**, **34216761250**

Product Description

Specifications	
Product name	BMW X5/740 Brake Pad
Model	BMW X5/740
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-04001
FMSI	D681
OEM	34116761252
Braking System	ATE
Size	
Width	156.3 mm
Height	73.2 mm
Thickness	18.3 mm
Model_MARKE	Series 5 E39(1995-2004)/Series 7 E38(1994-2001)/X3E83(2004)/X5E53(2000)

Optimal Braking Performance with BMW X5/740 Ceramic Brake Pads
Elevate your BMW X5 or 740's driving experience with our top-of-the-line Ceramic Brake Pads. Engineered with precision, our brake pads carry the part number 34216761250 and conform to the D683 standard, ensuring a perfect fit and exceptional performance.
Our Ceramic Brake Pads are designed to provide a significant reduction in brake dust and noise, offering a cleaner and quieter ride. The robust ceramic formulation delivers a consistent, responsive braking experience, enhancing your vehicle's safety and handling.
Compatible with a wide range of BMW models, these brake pads are prepared for wear sensors and come with chamfered edges to ensure a smooth installation and operation. Trust in the durability and advanced technology of our Ceramic Brake Pads to keep your BMW in peak condition.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
