Mitsubishi Pajero,Ceramic Brake Pad,D733,MN102626,R

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Mitsubishi Pajero Ceramic Brake Pad
- Model: Mitsubishi Pajero
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-23011
- F/R: R
- FMSI: D733
- OEM: MN102626
- Braking System: Sumitomo
- Highlight: **mitsubishi ceramic brake pad**, **mitsubishi ceramic brake pads**

Product Description

Specifications	
Product name	Mitsubishi Pajero Brake Pad
Model	Mitsubishi Pajero
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-23011
FMSI	D733
OEM	MN102626
Braking System	Sumitomo
Size	
Width	78.8 mm
Height	58.9 mm
Thickness	14.9 mm
Model_MARKE	Beijing Jeep 4500 (2004 model)/ Beijing Jeep 4700 (2004 model)/ Mitsubishi Eclipse/ Mitsubishi Pajero Sport

Mitsubishi Pajero Ceramic Brake Pads (D733, MN102626, R)
Elevate your Mitsubishi Pajero's braking system with our top-of-the-line Ceramic Brake Pads. Our D733 model is specifically designed to enhance your vehicle's safety and performance. With part number MN102626, these pads are tailored to fit seamlessly, ensuring easy installation and optimal compatibility. The 'R' classification indicates a robust design, capable of handling the rigorous demands of daily driving. Enjoy a significant reduction in brake dust and noise, all while maintaining a superior friction coefficient for that extra peace of mind during every journey. Choose our Ceramic Brake Pads for a reliable, high-performance braking experience.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
