

Nissan Paladin Carbon Ceramic Brake Pads D830 , Front 41060-7Z025

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Nissan Paladin Ceramic Brake Pad
- Model: Nissan Paladin
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-22009
- F/R: F
- FMSI: D830
- OEM: 41060-7Z025
- Braking System: AKB
- Highlight: **41060-7Z025 carbon ceramic brake pads ,
Nissan Paladin ceramic brake pads ,
41060-7Z025**

Product Description

Specifications	
Product name	Nissan Paladin Brake Pad
Model	Nissan Paladin
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-22009
FMSI	D830
OEM	41060-7Z025
Braking System	AKB
Size	
Width	164.1 mm
Height	56.9 mm
Thickness	16.0 mm
Model_MARKE	Nissan Paladin 2.4i 4WD/ 3.3i 4WD/ 2WD/ 4WD (2007 model)/ Livina/ Nissan Jeep/ Fuga Y50/ BAIC BJ40

Optimize Your Nissan Paladin's Braking with D830 Ceramic Brake Pads

Ensure your Nissan Paladin's safety and performance with our **Ceramic Brake Pads (D830, 41060-7Z025, F)**. These high-quality brake pads are designed to provide your vehicle with superior stopping power and a quieter, more comfortable braking experience.

Our D830 brake pads are made from advanced ceramic materials that reduce brake dust and noise, making for a cleaner and more pleasant drive. With dimensions of **width: 164.2 mm, height: 56.7 mm, thickness: 16.9 mm**, they are engineered to fit a wide range of Nissan models, including the rugged Nissan Paladin, ensuring easy installation and a perfect fit.

Key Features:

Quiet Operation: Our ceramic pads significantly reduce braking noise.

Reduced Brake Dust: Keep your wheels looking clean with our low-dust formula.

Enhanced Durability: Experience long-lasting performance with our robust ceramic material.

Perfect Compatibility: Designed to match your Nissan Paladin's specifications for a seamless fit.

Whether you're off-roading or navigating city streets, our Ceramic Brake Pads will provide the reliability and control you need.

Upgrade to our D830 pads and enjoy a superior braking experience in your Nissan Paladin.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
