D910 Ford Mondeo Brake Pad C2S17129 Front Ceramic Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Ford Mondeo Ceramic Brake Pad
- Model: Ford Mondeo
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-10003
- F/R: F
- FMSI: D910
- OEM: C2S17129
- Braking System: Bosch
- Highlight: **C2S17129 Ford Mondeo Brake Pad**, **C2S17129 front ceramic brake pads**, **C2S17129**

Product Description

Specifications	
Product name	Ford Mondeo Brake Pad
Model	Ford Mondeo
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-10003
FMSI	D910
OEM	C2S17129
Braking System	Bosch
Size	
Width	148.7 mm
Height	60.5 mm
Thickness	18.4 mm
Model_MARKE	Mondeo 2.0/ 2.4 MONDEO/ Santa Fe/ Jaguar/ 2005 Mondeo/ Changan CM8 SC6380/ 2007 Mondeo

Ford Mondeo Ceramic Brake Pads - Model D910 (C2S17129)
Revitalize your Ford Mondeo's braking system with our Model D910 ceramic brake pads. These pads are precision-engineered to provide a perfect fit and outstanding braking performance for your vehicle. The ceramic material offers a significant reduction in brake dust and noise, ensuring a clean and quiet operation.
Key Features:
Custom-Designed: Specifically made for the Ford Mondeo, guaranteeing a perfect match and easy installation.
High-Quality Material: The ceramic compound provides excellent stopping power with minimal wear on rotors.
Quiet Braking: Engineered to reduce braking noise for a more pleasant driving experience.
Dust Reduction: Keeps your wheels cleaner by producing less brake dust compared to traditional materials.
With our ceramic brake pads, you'll enjoy a new level of braking confidence, whether navigating busy city streets or cruising on the highway.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
