

525 Bmw 3 Series Brake Pads Ceramic Brake Pad D947 34111164 627 F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: BMW 3 Series 525 Ceramic Brake Pad
- Model: BMW 3 Series 525
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-04019
- F/R: F
- FMSI: D947
- OEM: 34111164 627
- Braking System: ATE
- Highlight: **525 bmw 3 series brake pads,**
bmw 3 series brake pads D947, 34111164 627

Product Description

Specifications	
Product name	BMW 3 Series 525 Brake Pad
Model	BMW 3 Series 525
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-04019
FMSI	D947
OEM	34111164 627
Braking System	ATE
Size	
Width	155.2mm
Height	63.8 mm
Thickness	19.4 mm
Model_MARKE	Series 3 E46(98-05)/Series 5 E39(97-04)

Maximize Your BMW 3 Series 525's Performance with Our Advanced Ceramic Brake Pads

Elevate your driving experience with our premium ceramic brake pads, specifically designed for the BMW 3 Series 525. Our model **D947** is engineered to match the exacting standards of your vehicle, ensuring compatibility with OEM part number **34111164 627**.

Key Features:

Exceptional Braking Power: Achieve superior control and safety with our brake pads that offer enhanced stopping capabilities.

Quiet Operation: Enjoy a noise-free ride thanks to the ceramic composition that minimizes brake squeal.

Low Dust Formula: Maintain the pristine appearance of your wheels with our brake pads that significantly reduce dust production.

Durability: Benefit from a longer lifespan compared to conventional pads, thanks to our high-quality materials that resist wear and tear.

Our ceramic brake pads are the perfect choice for BMW 3 Series 525 owners who demand the best in safety, performance, and comfort. Make the switch today and experience the difference in every journey!

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
