

Toyota Prado Front Ceramic Pads D976 , 04465-35290 toyota brake pad replacement

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Toyota Prado Ceramic Brake Pad
- Model: Toyota Prado
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-11016
- F/R: F
- FMSI: D976
- OEM: 04465-35290
- Braking System: Sumitomo
- Highlight: **Toyota Prado front ceramic pads , 04465-35290 front ceramic pads , Toyota front ceramic pads**

Specifications	
Product name	Toyota Prado Brake Pad
Model	Toyota Prado
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-11016
FMSI	D976
OEM	04465-35290
Braking System	Sumitomo
Size	
Width	134.6 mm
Height	77.5 mm
Thickness	16.9 mm
Model_MARKE	Toyota Prado 4000 4.0i 4WD/ New Prado 2700/ Prado 3400/ Prado 4000/ Prado 4700/ Lexus GX470 (2003-2006 models)

Toyota Prado: Experience Unmatched Braking with D976 Ceramic Brake Pads

Elevate your Toyota Prado's safety and performance with our D976 ceramic brake pads, designed to meet the demands of your adventurous drives. These pads are engineered to fit seamlessly with your Prado, corresponding to the OEM part number **04465-35290**.

Key Features:

Advanced Braking Technology: Our ceramic brake pads deliver exceptional stopping power, ensuring quick and responsive braking.

Quiet Operation: Enjoy a peaceful drive with reduced brake noise, thanks to our specially formulated ceramic material.

Clean Wheels: Our brake pads are crafted to produce minimal dust, keeping your Prado's wheels looking pristine.

Durability: Made with high-quality materials, our brake pads withstand the test of time, offering longevity and reliability.

Whether you're navigating rugged terrains or cruising the city streets, our ceramic brake pads provide consistent braking performance that you can trust. Upgrade to our D976 pads for your Toyota Prado and experience the difference at every stop!

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
