

Ceramic Volvo Xc90 Front Brake Pads D979 OEM 2742856 ATE Braking System

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Volvo XC90 Ceramic Brake Pad
- Model: Volvo XC90
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-25003
- F/R: F
- FMSI: D979
- OEM: 2742856
- Braking System: ATE
- Highlight: **D979 volvo xc90 front brake pads,
2742856 volvo xc90 front brake pads,
Ceramic volvo xc90 front brake pads**

Product Description

Specifications	
Product name	Volvo XC90 Brake Pad
Model	Volvo XC90
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-25003
FMSI	D979
OEM	2742856
Braking System	ATE
Size	
Width	155.2 mm
Height	72.9 mm
Thickness	18.6 mm
Model_MARKE	Volvo XC90 (2002/10-)

Volvo XC90 Ceramic Brake Pads (D979, 2742856)

Upgrade your Volvo XC90's braking system with our top-of-the-line Ceramic Brake Pads. Engineered to match the exact specifications of your vehicle, these brake pads are designated with the part number D979 and OEM number 2742856, ensuring a seamless fit for models from 2003 to 2014.

Our Ceramic Brake Pads are designed for longevity and performance, providing you with a quieter, more responsive braking experience. The advanced ceramic material reduces brake dust, keeping your wheels cleaner and maintaining the aesthetic of your XC90. With a focus on safety and quality, these brake pads offer excellent stopping power even in the most demanding driving conditions.

Key Features:

Custom-fit for Volvo XC90 models (2003-2014)

Part Number: D979

OEM Number: 2742856

Advanced ceramic formula for reduced noise and dust

Exceptional stopping power and durability

Easy installation for a quick and hassle-free upgrade

Ensure your Volvo XC90 is equipped with the best for a safe and comfortable drive. Choose our Ceramic Brake Pads for a superior braking experience every time.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
