

Porsche 911 03-07 Ceramic Brake Pad 99635194801 Front Ceramic Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 50
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Porsche 911 03-07 Ceramic Brake Pad
- Model: Porsche 911 03-07
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-05008
- F/R: F
- FMSI: D991
- OEM: 99635194801
- Braking System: Brembo
- Highlight: **Porsche 911 03-07 front ceramic pads,
Porsche 911 03-07 ceramic brake pad,
99635194801 front ceramic pads**

Product Description

Specifications	
Product name	Porsche 911 03-07 Brake Pad
Model	Porsche 911 03-07
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-05008
FMSI	D991
OEM	99635194801
Braking System	Brembo
Size	
Width	190.3 mm
Height	102 mm
Thickness	16.1 mm
Model_MARKE	911 (996) 1997/09-2005/08,911 (997) 2004/207-,911 Convertible (997) 2005/04-,Carrera GT Convertible 2003/07-

Porsche 911 (03-07) Ceramic Brake Pads (D991, 99635194801, Front)

Unleash the full potential of your Porsche 911's braking system with our Ceramic Brake Pads, specifically designed for models from 2003 to 2007. Our pads, identified by part number D991 and OEM number 99635194801, are engineered for the front axle, ensuring a perfect match and superior performance.

Crafted from a high-quality ceramic compound, these brake pads offer exceptional stopping power, reduced brake noise, and minimal dust production, preserving the cleanliness of your wheels. The ceramic material provides excellent resistance to wear and high temperatures, making them ideal for both daily driving and spirited performance use.

Key Features:

Tailored for Porsche 911 models from 2003 to 2007

Part Number: D991

OEM Number: 99635194801

Positioned for the front axle

Enhanced stopping power with ceramic technology

Low noise and dust for a cleaner driving experience

Optimal heat resistance and longevity

Whether you're enjoying a leisurely drive or pushing the limits on the track, our Ceramic Brake Pads will ensure that your Porsche 911 stops as impressively as it goes. Upgrade to our Ceramic Brake Pads and experience the pinnacle of braking confidence and control.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
