

New Lexus RX350 Ceramic 04466-48040 Lexus Rx 350 Rear Brake Pad Replacement

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: New Lexus RX350 Ceramic Brake Pad
- Model: New Lexus RX350
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-17011
- F/R: R
- FMSI: D996
- OEM: 04466-48040
- Braking System: Sumitomo
- Highlight: **New Lexus RX350 rear brake pad replacement, 04466-48040 lexus rx 350 rear brake pad replacement , 04466-48040**

Product Description

Specifications	
Product name	New Lexus RX350 Brake Pad
Model	New Lexus RX350
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-17011
FMSI	D996
OEM	04466-48040
Braking System	Sumitomo
Size	
Width	101.8 mm
Height	44 mm
Thickness	15.1 mm
Model_MARKE	Lexus RX350 (07 model)/ Lexus RX330 (04-06 models)/ Lexus RX400H (06 model)/ Estima ACR30 (04 model)/ Estima TCR (05 model)/ Leopaard CS10/ 2013-2015 Zotye Z500 T600/ Zotye T300

New Lexus RX350 Ceramic Brake Pads (D996, 04466-48040, Rear)

Ensure the safety and performance of your Lexus RX350 with our Ceramic Brake Pads, tailored for the rear brakes with part number D996 and OEM number 04466-48040. These brake pads are designed to provide the ultimate braking experience, combining durability, low noise, and minimal dust production.

Our Ceramic Brake Pads are made from advanced ceramic compounds that offer superior stopping power and fade resistance, ensuring reliable performance in various driving conditions. The low-dust formula not only keeps your wheels clean but also reduces wear on the rotor, extending the life of your braking system.

Key Features:

Custom-designed for the rear brakes of the New Lexus RX350

Part Number: D996

OEM Number: 04466-48040

High-performance ceramic material for excellent stopping power

Reduced brake dust and noise for a cleaner and quieter ride

Enhanced durability for long-lasting use

With our Ceramic Brake Pads, you can expect a smoother and more responsive braking experience, giving you peace of mind every time you're behind the wheel. Upgrade your Lexus RX350 with our premium brake pads and enjoy the difference in quality and performance.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
