

## Chevrolet Lova Ceramic Brake Shoes Replacement S814 Rear 93740252

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: Herito
- Certification: CCC, IATF 16949
- Model Number: 93740252
- Minimum Order Quantity: 200
- Price: Negotiable
- Packaging Details: Plastic film, custom box packaging, securely packaged
- Delivery Time: Within 7 days
- Payment Terms: Payment upon delivery
- Supply Ability: Production according to customer demand volume

### Product Specification

- Product Name: Chevrolet Lova Ceramic Brake Pad
- Model: Chevrolet Lova
- Type: Brake Shoes
- Material: Ceramic
- Factory No.: ZK-27902
- F/R: R
- FMSI: S662
- OEM: 93740252
- Braking System: TRW
- Highlight: **93740252 ceramic brake shoes, Chevrolet Lova 93740252, Rear ceramic brake shoes**

## Product Description

Specifications	
Product name	Chevrolet Lova Brake Pad
Model	Chevrolet Lova
Type	Brake Shoes
Material	Ceramic
F/R	R
Factory No.	ZK-27902
FMSI	S814
OEM	93740252
Braking System	TRW
Size	
Width	36 mm
Diameter	200 mm
Model_MARKE	Chevrolet Aveo/ Chevrolet Lova 1.4/1.6L/ Chevrolet Lova/ Chevrolet Aveo 1.4/1.6L/ Chevrolet Kalos

### Chevrolet Lova Ceramic Brake Shoes (S814, 93740252, R)

Ensure your Chevrolet Lova's safety and performance with our top-grade ceramic brake shoes. Our S814 model is crafted with advanced ceramic materials to provide exceptional stopping power, minimal noise, and reduced brake dust. The OEM part number 93740252 guarantees that these brake shoes are designed to fit your Chevrolet Lova perfectly, ensuring easy installation and optimal compatibility.

These brake shoes are engineered for durability and reliability, offering a long service life and consistent braking force. The 'R' designation indicates a high-quality replacement part that meets or exceeds original equipment specifications. Trust our ceramic brake shoes to deliver enhanced braking performance for your Chevrolet Lova.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
