Product Description:

Included with this brake pad set is the necessary hardware for installation, making the process quick and hassle-free. You won't have to worry about purchasing additional hardware separately.

One of the standout features of this product is its friction material composition. The ceramic material used in these brake pads is considered the best brake pad material due to its ability to provide consistent stopping power and durability. Ceramic brake pads are known for their low dust output, which helps keep your wheels clean. They also provide a quieter and smoother ride compared to other brake pad materials.

These disc brake pads are a great investment for your vehicle's safety and performance. They are engineered to withstand high temperatures and provide reliable stopping power in various driving conditions. With the best ceramic brake pads, you can trust that your vehicle will come to a stop quickly and smoothly.

Overall, the Disc Brake Pad Set with Factory No: ZK-26008 and Fmsi: D451 is an excellent choice for those in need of new brake pads. Its ceramic composition, lightweight design, and included hardware make it a top contender for the best disc brake pads on the market. Don't hesitate to invest in the safety and performance of your vehicle today!

Features:

Product Name: Disc Brake Pad Set

Friction Material Composition: Ceramic

Dimensions: 8.5 X 5.5 X 2.5 Inches

Factory No: ZK-26008

Silent Design: Chamfer Design

Hardware Included: Yes

These disc brake pads are made of ceramic, which is considered the best brake pad material for many reasons. In addition to their superior stopping power, they also produce less dust and noise compared to other materials.

Technical Parameters:

Fmsi	D451
Oe Replacement	Yes
Braking System	GRL
Asbestos-Free	Yes
Product Type	Automotive Replacement Brake Pads
Hardware Included	Yes
Material	Ceramic
Factory No	ZK-26008
Compatibility	Fits Various Makes And Models
Weight	2.2 Pounds

These Disc Brake Pads are a great option for those looking for the best brake pad brand, good ceramic brake pads, and the best brake pad material. They are designed to be asbestos-free, making them safe for use. With OE replacement and hardware included, they are easy to install and compatible with various makes and models.

Applications:

The friction material composition of the ceramic brake pad ensures that it provides excellent stopping power, making it ideal for use in various occasions and scenarios. The ceramic brake pad is highly efficient in effectively stopping a vehicle by converting kinetic energy into thermal energy.

One of the best features of the Herito ceramic brake pad is its silent design, which is achieved through chamfer design. It ensures that the brake pad provides a noiseless and smooth braking experience, making it perfect for use in quiet residential areas or late-night driving. The Herito Disc Brake Pad Set with factory no ZK-26008 has been designed to fit into various models and makes of vehicles, making it a versatile product suitable for different scenarios. Its compatibility with the GRL braking system ensures that it provides consistent and reliable braking performance.

If you are looking for the best brake pad brand to replace your vehicle's worn-out brake pads, you should consider the Herito Disc Brake Pad Set. It is one of the best ceramic brake pads on the market, offering superior performance, excellent stopping power, and a noiseless and smooth braking experience.
