Product Description

Product Description:

FMSI rated at D815, this brake pad set is guaranteed to meet or exceed OEM specifications. The FMSI number is an industry-standard code that identifies the brake pad shape, size, and type of friction material used. This ensures that you are getting a brake pad set that is specifically designed to fit your vehicle and provide optimal performance.

Manufactured by one of the top brake pad manufacturers in the industry, this Nissan High Friction Brake Pad Set is built to last. With a manufacturer part number of D1060-9N00A, you can be sure that you are getting a quality product that is made to the highest standards. When it comes to your vehicle's safety, you want to make sure that you are using the best brake pads available. The Nissan High Friction Brake Pad Set is the perfect choice for those who demand the best. With its ceramic construction, this brake pad set provides excellent stopping power, even in extreme driving conditions.

In conclusion, the Nissan High Friction Brake Pad Set is a top-quality product that is designed to provide superior stopping power and quiet operation. With its FMSI rating of D815 and manufacturer part number of D1060-9N00A, you can be sure that you are getting a brake pad set that is specifically designed to fit your Nissan vehicle. So, if you want the best for your vehicle, choose the Nissan High Friction Brake Pad Set today.
