These Porsche brake pad sets are the best kind of brake pads that you can get for your Porsche 911, Boxster, or Cayman. They have a thickness of 14mm and weigh 2.5 lbs. They come with hardware, wear sensors, and shims, and are installed using a clip-in method. With a 1 year warranty, these brake pads are a great investment for your Porsche. Plus, they are made of ceramic, which makes them the best ceramic brake pads on the market.

### Applications:

These brake pads are perfect for occasions where high-performance braking is required, such as racing or aggressive driving. The ceramic material used in the brake pads provides excellent stopping power and durability, making them a great choice for those who want the best performance from their Porsche.

The installation method for these brake pads is clip-in, which means that they can be easily installed without the need for any special tools or equipment. The shims are included in the package, which helps to ensure that the brake pads are properly aligned and that there is no brake noise or vibration during braking.

When it comes to breaking in ceramic brake pads, it is important to follow the manufacturer's recommendations for the best performance and longevity of the brake pads. It is recommended to avoid harsh braking during the first few hundred miles of driving to allow the brake pads to properly bed in. This will help to ensure that the brake pads brake smoothly and provide consistent stopping power over their lifespan.

In summary, the Herito Brake Pad Set Model Number 201562 from China Zibo is an excellent choice for those who want high-performance braking for their Porsche 911, Boxster, or Cayman. The ceramic material, clip-in installation method, and included shims make these brake pads a great value for any Porsche owner. Just remember to follow the manufacturer's recommendations for breaking in ceramic brake pads for the best performance and longevity.
