Product Description

Product Description:

The Nissan High Friction Brake Pad Set is perfect for those who want a premium brake pad that can handle anything that the road throws at them. The FMSI of these brake pads is D815, which means that they are designed to fit perfectly on the front of your Nissan vehicle. This ensures that you get the best possible performance out of your braking system.

The Akebono braking system of these brake pads is another reason why they are so effective. Akebono is a world-renowned manufacturer of brake pads and other braking components, and they are known for their high-quality products. This means that you can be confident that these brake pads will provide you with the braking power you need to stop your vehicle quickly and safely.

The Nissan High Friction Brake Pad Set is specifically designed for use on the front of your vehicle, which makes it an excellent choice for those who need extra stopping power. Whether you are driving in heavy traffic or need to make an emergency stop, these brake pads will help keep you safe and secure on the road.

With a 1-year warranty, you can be confident in the quality of these brake pads. Nissan is a trusted name in the automotive industry, and they stand behind their products. This means that if you experience any issues with your brake pads, you can be sure that they will be taken care of quickly and efficiently.

In conclusion, if you are looking for a high-quality Nissan Vehicle Brake Pad Set that will provide you with excellent braking performance and reliability, then the Nissan High Friction Brake Pad Set is the perfect choice for you. With its ceramic brake pads wholesale, FMSI D815, Akebono braking system, front position, and 1-year warranty, you can be confident that you are getting the best possible product for your Nissan vehicle.
