

DBPS Disc Brake Pad Set Engineered to Fit Different Vehicle Models Includes After Service Support for Brake Performance

Our Product Introduction

for more products please visit us on brakepadsset.com

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

Product Specification

- Width: 50mm
- Product Code: DBPS
- Size: Standard
- Fmsi: D1258
- Braking System: ATE
- Factory No: ZK-24008
- Manufacturer Part Number: DBP-001
- Dimensions: Varies By Model (e.g., 120mm X 50mm X 15mm)

Product Description

Product Description:

The Disc Brake Pad Set DBP-001 is a high-quality replacement component designed to provide exceptional braking performance and durability for a wide range of vehicles. Manufactured under the strict quality standards of factory number ZK-24008, this brake pad set is engineered to meet and exceed OEM specifications, ensuring reliable and consistent stopping power. With a weight of approximately 1.2 Kg per set, it offers a perfect balance of sturdiness and ease of installation, making it an ideal choice for both professional mechanics and DIY enthusiasts.

One of the key features of this Disc Brake Pad Set is the inclusion of good ceramic brake pads. Ceramic brake pads are known for their superior performance characteristics, including quieter operation, less dust generation, and enhanced heat dissipation compared to traditional metallic brake pads. These qualities make ceramic brake pads an excellent option for drivers who seek a smooth, comfortable driving experience without compromising safety and effectiveness. The ceramic material used in this brake pad set helps to maintain consistent friction levels, even under heavy braking conditions, resulting in reliable stopping distances and improved overall vehicle control.

In addition to the ceramic brake pads themselves, this set comes complete with all necessary accessories to facilitate a hassle-free installation. The inclusion of shims is particularly noteworthy, as they play a crucial role in reducing brake noise and vibrations during operation. Shims act as a buffer between the brake pads and caliper, helping to minimize the squealing sounds that often accompany brake usage. This thoughtful addition enhances the overall driving experience by contributing to quieter and smoother braking performance.

Furthermore, the Disc Brake Pad Set DBP-001 is designed to be compatible with a wide range of brake pad tools, making it easier for users to install and service the pads without the need for specialized or expensive equipment. Whether you are using a standard brake pad tool or a more advanced brake servicing kit, this brake pad set's design ensures a straightforward, secure fit. This compatibility simplifies maintenance procedures and reduces downtime, allowing you to get back on the road quickly and safely.

Durability is another hallmark of this brake pad set. The ceramic compound used in these pads is engineered to resist wear and tear from everyday driving as well as more demanding conditions. This means that the brake pads maintain their structural integrity and performance over an extended period, reducing the frequency of replacements and ultimately saving you money. Additionally, the robust construction helps protect the brake rotor from excessive wear, further extending the lifespan of your braking system.

Safety is paramount when it comes to braking components, and this Disc Brake Pad Set is designed with that principle at its core. The precise manufacturing standards and rigorous quality control processes ensure that each set delivers consistent braking performance. This reliability is critical for maintaining control in emergency braking situations and for providing peace of mind on every journey.

In summary, the Disc Brake Pad Set DBP-001 combines the benefits of good ceramic brake pads, essential accessories including shims, and compatibility with standard brake pad tools, all wrapped in a durable package weighing approximately 1.2 Kg per set. Manufactured under the factory number ZK-24008, this product offers an excellent balance of performance, longevity, and ease of installation. Whether you are upgrading your current brake system or replacing worn-out pads, this set is a dependable choice that enhances safety, reduces noise, and improves overall driving comfort.

Features:

Product Name: Disc Brake Pad Set

After Service: Yes

Factory No: ZK-24008

Dimensions: Varies By Model (e.g., 120mm X 50mm X 15mm)

Color: Black / Grey

Product Code: DBPS

Made with the best brake pad material for superior performance and durability

Features the best ceramic brake pads for enhanced braking efficiency and reduced noise

Compatible with standard brake pad tools for easy installation and maintenance

Technical Parameters:

Braking System	ATE
Factory No	ZK-24008
Dimensions	Varies By Model (e.g., 120mm X 50mm X 15mm)
Accessories	Yes
Material	Semi-metallic / Ceramic / Organic
Model	Chery A3
Color	Black / Grey
Shims Included	Yes
Fmsi	D1258
After Service	Yes

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is designed to offer exceptional braking performance across a wide range of applications and scenarios. Manufactured in China, this set is engineered to meet the highest standards of quality and durability, making it an ideal choice for both everyday driving and more demanding conditions. With a weight of approximately 1.2 kg per set, these disc brake pads are crafted to provide reliable stopping power without compromising on performance or safety.

One of the primary application occasions for the ZKZB Disc Brake Pad Set is in standard passenger vehicles requiring OEM brake pads that fit precisely and perform consistently. These brake pads are compatible with ATE braking systems, ensuring seamless integration and optimal functionality. Whether you're replacing worn-out pads during routine maintenance or upgrading your braking components, this set offers a dependable solution that restores your vehicle's braking efficiency.

In addition to regular daily driving, the ZKZB disc brake pads are well-suited for urban commuting and highway travel, where smooth and quiet braking is essential. The set comes in two color options, black and grey, which reflect the premium quality materials used, including semi-metallic, ceramic, and organic compounds. Among these, the ceramic brake pads provide enhanced heat dissipation and reduced brake dust, making them perfect for drivers who prioritize cleanliness and long-lasting performance.

The versatility of this disc brake pad set also extends to light commercial vehicles and sportier models that demand a more robust braking system. Thanks to the semi-metallic material option, the pads can withstand higher temperatures and offer superior friction characteristics, which are critical during more aggressive driving or in hilly terrain. This makes the ZKZB ZK-11011 an excellent choice for various driving scenarios, from city streets to mountainous routes.

Overall, the ZKZB Disc Brake Pad Set (Manufacturer Part Number DBP-001) provides a comprehensive braking solution that caters to diverse needs. Its combination of semi-metallic, ceramic, and organic materials allows users to select the type of disc brake pads that best suit their driving style and vehicle requirements. Whether you need OEM brake pads for maintenance or ceramic brake pads for enhanced performance, this product ensures safety, durability, and comfort in every braking occasion.
