

Anti rust coating Disc Brake Pad Set Ensuring High Wear Resistance and Low Noise Operation Perfect for Commercial Vehicle

Our Product Introduction

for more products please visit us on brakepadsset.com

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

Product Specification

- Hardware Included: Yes
- Braking System: WAG
- Brake Type: Disc Brakes
- Corrosion Resistance: Anti-rust Coating
- Package Quantity: 1 Set
- Fmsi: D1674A
- Silent Design: Chamfer Design
- Durability: High Wear Resistance

Product Description:

Introducing our premium Disc Brake Pad Set, meticulously engineered to deliver exceptional performance and reliability for your vehicle's braking system. Designed with precision and quality in mind, this set caters to drivers who demand the best in safety, durability, and efficiency. Whether you're upgrading your current brake system or replacing worn-out pads, this product stands out as one of the best brake pad brand options available on the market today.

Each package contains 1 complete set of disc brake pads, ensuring you have everything needed for a seamless installation. Hardware is included, making it convenient and straightforward to upgrade your braking system without the need for additional purchases. This comprehensive package ensures that every component works harmoniously to optimize your vehicle's braking performance.

Our disc brake pads are specifically designed for WAG braking systems, offering compatibility and superior functionality. The friction coefficient ranges between 0.35 and 0.45, striking the perfect balance between effective stopping power and minimal wear. This friction range ensures consistent performance under various driving conditions, whether you're navigating city streets or tackling challenging terrains.

The brake pads utilize a disc brake type, known for their superior heat dissipation and reliable stopping power compared to drum brakes. This makes them ideal for modern vehicles that require responsive and efficient braking. By choosing this disc brake pad set, you are investing in a product that enhances safety and driving confidence, delivering smooth and quiet braking every time.

One of the standout features of this product is its use of high-quality ceramic material. As one of the best ceramic brake pads available, it combines the benefits of excellent heat resistance, reduced brake dust, and longer lifespan compared to traditional metallic pads. These good ceramic brake pads not only protect your braking system but also keep your wheels cleaner, reducing maintenance efforts and preserving the aesthetic appeal of your vehicle.

Additionally, ceramic brake pads offer a quieter braking experience. Unlike some other brake pad materials that can produce annoying squealing or grinding noises, these pads provide a smooth, quiet stop, enhancing overall driving comfort. This makes them particularly suitable for daily drivers who value a peaceful and controlled ride.

Durability is another key advantage of this disc brake pad set. The ceramic formulation is engineered to withstand high temperatures and resist wear, ensuring long-lasting performance even under demanding driving conditions. This means fewer replacements and better value over time, making this set a cost-effective solution for maintaining your vehicle's braking efficiency.

Safety is paramount when it comes to vehicle maintenance, and choosing the right brake pads is crucial. Our disc brake pad set meets stringent quality standards and undergoes rigorous testing to ensure optimal performance. By opting for this product, you are selecting a trusted solution that prioritizes your safety and the safety of others on the road.

In summary, this Disc Brake Pad Set offers a perfect combination of high-quality materials, excellent friction performance, and comprehensive hardware inclusion, making it an ideal choice for anyone looking to upgrade or replace their brake pads. With its compatibility with WAG braking systems, superior ceramic composition, and friction coefficient designed for reliable stopping power, this product represents one of the best brake pad brand options available. Experience the benefits of good ceramic brake pads that provide durability, quiet operation, and effective braking – all in one convenient set.

Features:

- Product Name: Disc Brake Pad Set
- Friction Coefficient: 0.35 - 0.45 for reliable stopping power
- Compatibility: Universal fit for most vehicles
- Quantity: 4 pieces per set
- Durability: High wear resistance for long-lasting performance
- FMSI Number: D1674A
- Made with premium materials to provide the best ceramic brake pads experience
- Designed as ceramic brake pads to reduce noise and dust
- Compatible with standard brake pad tool for easy installation

Technical Parameters:

Durability	High Wear Resistance
Noise Level	Low Noise Operation
Brake Type	Disc Brakes
OE Replacement	Yes
Thickness	0.5 Inches
Silent Design	Chamfer Design
Hardware Included	Yes
FMSI	D1674A
Compatibility	Universal Fit For Most Vehicles
Quantity	4 Pieces Per Set

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is designed to provide reliable and efficient braking performance in a variety of applications. Originating from China, these disc brake pads are engineered to meet OE replacement standards, ensuring compatibility and high quality for vehicles equipped with WAG braking systems. With a friction coefficient ranging from 0.35 to 0.45, the ZKZB disc brake pads deliver consistent stopping power, making them ideal for both everyday driving and more demanding scenarios. These disc brake pads are perfect for use in passenger cars, light trucks, and SUVs that require dependable braking components. Whether you are commuting in urban traffic, driving on highways, or navigating winding roads, the ZKZB disc brake pads offer smooth and responsive braking, enhancing safety and control. Their easy installation with standard tools makes them a convenient choice for both professional mechanics and DIY enthusiasts, reducing downtime and maintenance costs. In addition to everyday driving, the ZKZB disc brake pads excel in scenarios where reliable braking is critical, such as long-distance travel, mountainous terrain, and stop-and-go traffic conditions. Their design and materials ensure minimal noise and reduced brake dust, contributing to a cleaner and more comfortable driving experience. The FMSI code D1674A confirms their precise fitment and adherence to industry standards, further supporting their application in various vehicle models. For fleet operators and service centers, the ZKZB Disc Brake Pad Set provides a cost-effective solution without compromising quality or performance. These pads are well-suited for vehicles undergoing routine maintenance or brake system upgrades, delivering consistent results that meet or exceed OEM expectations. Overall, the ZKZB disc brake pads combine durability, efficiency, and ease of installation, making them an excellent choice for a wide range of braking needs.

Customization:

Our Disc Brake Pad Set, model number ZK-11011 from the reputable brand ZKZB, offers exceptional product customization services tailored to meet your specific needs. Manufactured in China, this set includes 1 package quantity complete with all necessary hardware for easy installation. Designed with high wear resistance, these ceramic brake pads ensure long-lasting durability and reliable performance. Featuring a silent chamfer design, they provide smooth and quiet braking, making them one of the best ceramic brake pads available on the market. Compatible with the WAG braking system, this product combines quality and innovation to deliver superior braking power. Choose ZKZB for the best ceramic brake pads experience.
