Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

Product Specification

- Model: Buick Firstland
- Factory No: ZK-36003
- Chamfered: Yes
- Color: Black
- Friction Coefficient: 0.35
- Oe Replacement: Yes
- Quantity: 4 Pieces Per Set
- Package Contents: 4 Brake Pads

Product Description:

The Disc Brake Pad Set designed specifically for the Buick Firstland model offers exceptional braking performance, combining durability, safety, and quiet operation. Engineered to meet or exceed OEM specifications, this set of ceramic brake pads is the ideal choice for drivers seeking reliability and superior stopping power. With a friction coefficient of 0.35, these brake pads provide consistent and effective braking performance under various driving conditions, ensuring you maintain control and confidence on the road at all times. This set includes 4 pieces per set, providing a complete replacement for the front or rear brake system, depending on your vehicle's requirements. Each brake pad is precisely manufactured to fit the Buick Firstland, ensuring an easy installation process and optimal compatibility. The package also includes shims, which are essential for reducing noise and vibration, contributing to a quieter and smoother braking experience. The inclusion of shims highlights the attention to detail in the design and manufacturing process, making this disc brake pad set an excellent choice for those who prioritize comfort alongside performance.

One of the standout features of this product is its ceramic composition. Ceramic brake pads have gained widespread recognition as the best ceramic brake pads available on the market today. Unlike traditional metallic or organic pads, ceramic brake pads offer several advantages, including less dust production, reduced brake noise, and longer lifespan. This makes them particularly appealing for drivers who want a clean, quiet, and low-maintenance braking system. Additionally, ceramic brake pads tend to operate at cooler temperatures, which helps prevent the brake system from overheating and extends the overall durability of both pads and rotors.

With interchange part numbers D1293 and D1222, this brake pad set is compatible with multiple variants and ensures that you are getting a product that fits perfectly without the guesswork. This interchangeability adds convenience for those who may be replacing parts on similar vehicles or seeking a reliable aftermarket option. Whether you are performing routine maintenance or upgrading your braking system, this disc brake pad set addresses all your needs with precision and quality.

Choosing the best ceramic brake pads is crucial for vehicle safety and performance, and this disc brake pad set for the Buick Firstland stands out as a top-tier option. It combines the benefits of ceramic material with precise engineering to deliver smooth stops, excellent wear resistance, and minimal noise. Drivers can expect improved pedal feel and response, which enhances driving confidence, especially in emergency braking situations. These brake pads also contribute to the overall longevity of your braking system by minimizing rotor wear, which can save you money on future repairs and replacements.

In summary, this Disc Brake Pad Set is an excellent investment for anyone looking to maintain or upgrade their Buick Firstland's braking system. With a friction coefficient of 0.35, included shims, and a complete set of 4 pieces, it ensures reliable and consistent performance. The ceramic construction places it among the best ceramic brake pads available, offering superior braking efficiency, reduced noise, and longer service life compared to conventional pads. Compatible with interchange part numbers D1293 and D1222, it provides a hassle-free fit and dependable quality. Experience the difference that premium ceramic brake pads can make and enjoy safer, quieter, and more comfortable driving with this expertly crafted disc brake pad set.

Features:

- Product Name: Disc Brake Pad Set
- Factory No: ZK-36003
- High friction coefficient of 0.35 for reliable stopping power
- OE Replacement: Yes, ensuring perfect fit and performance
- Standard size suitable for most vehicles
- Package Contents: 4 Brake Pads included
- Designed as one of the best ceramic brake pads for enhanced durability and noise reduction
- Optimized for use as disc brake pads providing excellent braking efficiency

Technical Parameters:

OE Replacement	Yes
Interchange Part Number	D1293, D1222
Warranty	12 Months
Braking System	TKO
OEM	4252.18
Placement On Vehicle	Front And Rear
Package Contents	4 Brake Pads
Quantity	4 Pieces Per Set
Chamfered	Yes
Model	Buick Firstland

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is a high-quality product originating from China, designed to deliver exceptional performance and reliability. As part of the TKO braking system, these disc brake pads are engineered to meet the rigorous demands of various driving conditions, making them an excellent choice for both everyday commuting and more intense driving scenarios. One of the key application occasions for the ZKZB disc brake pads is routine vehicle maintenance. Whether you are replacing worn-out

brake pads or upgrading to a more efficient braking solution, this product offers an ideal fit with its standard size and chamfered edges, ensuring smooth and quiet braking performance. The chamfered design reduces noise and vibration, enhancing the overall driving experience.

These disc brake pads are also suitable for use in a wide range of vehicles that utilize the TKO braking system, thanks to their compatibility with interchange part numbers D1293 and D1222. This versatility makes the ZKZB ZK-11011 an excellent choice for mechanics and car enthusiasts looking for a reliable and easy-to-install brake pad set. The factory number ZK-36003 further attests to the precision manufacturing standards upheld by the brand.

For drivers who prioritize safety and performance, choosing the best brake pad brand is crucial. ZKZB has established itself as a trusted name in the automotive industry, offering disc brake pads that provide superior stopping power, durability, and heat resistance. These qualities make the ZKZB disc brake pads well-suited for various driving scenarios, from city traffic stop-and-go to highway cruising and even more demanding conditions such as mountainous terrain or heavy-load driving.

In summary, the ZKZB Disc Brake Pad Set ZK-11011 is designed for a wide range of application occasions and scenarios. Its compatibility with the TKO braking system, standard sizing, chamfered edges, and reliable interchange part numbers make it a versatile and dependable choice. Whether you are a professional mechanic or a vehicle owner seeking the best brake pad brand, these disc brake pads deliver consistent performance and safety, ensuring your vehicle stops effectively whenever it matters most.

Customization:

Our ZKZB Disc Brake Pad Set, model number ZK-11011, is designed and manufactured in China to meet the highest standards of quality and performance. As OEM brake pads, these pads serve as a perfect OE replacement, ensuring optimal fit and reliable braking performance. The set includes 4 black brake pads, featuring a friction coefficient of 0.35 for excellent stopping power. Crafted with the best brake pad material, these pads provide durability and consistent performance. Additionally, the pads are chamfered to reduce noise and enhance smooth braking operation. Choose the best ceramic brake pads from ZKZB for superior safety and comfort on the road.

Support and Services:

Our Disc Brake Pad Set is designed to provide superior stopping power and durability for a wide range of vehicles. For optimal performance, ensure the brake pads are installed by a qualified technician following the manufacturer's specifications.

Regular maintenance and inspection of your brake system are recommended to ensure safety and longevity. Replace the brake pads when the thickness reaches the minimum specification or if you experience any unusual noises or vibrations while braking.

Use only compatible brake fluids and avoid contamination of the brake pads and rotors with grease or oil. Proper bedding-in of the new brake pads is essential to achieve maximum performance and longevity; please follow the recommended bedding procedure provided in the product manual.

If you encounter any issues with the Disc Brake Pad Set, such as premature wear or braking performance problems, please consult with a professional mechanic or contact our authorized service centers for assistance.

We are committed to providing quality products and support. For additional information on installation, maintenance, or warranty, please refer to the product documentation included with your purchase.
