

Front and rear placement best ceramic brake pads featuring TKO braking system for braking performance under various conditions

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

Product Specification

- Factory No: ZK-36003
- Chamfered: Yes
- Oe Replacement: Yes
- Package Contents: 4 Brake Pads
- Braking System: TKO
- Color: Black
- Friction Coefficient: 0.35
- Model: Buick Firstland

Product Description

Product Description:

The Disc Brake Pad Set is an essential component designed to provide superior braking performance and enhanced safety for your vehicle. This set includes 4 pieces per set, ensuring you have all the necessary pads to replace the worn-out or damaged ones on your vehicle's braking system. Manufactured to meet and exceed original equipment (OE) standards, this product is an ideal OE replacement, guaranteeing a perfect fit and reliable function in your vehicle's TKO braking system.

One of the standout features of this Disc Brake Pad Set is its impressive friction coefficient of 0.35. This level of friction ensures consistent and effective braking power, allowing for smooth and controlled stops even under demanding driving conditions. Whether you're driving in city traffic or navigating winding roads, these brake pads deliver dependable performance, reducing stopping distances and enhancing your overall driving confidence.

As part of the TKO braking system, these brake pads are engineered to work seamlessly with the components in your vehicle's braking assembly. Their compatibility ensures optimal performance and longevity, minimizing wear and tear on your rotors and other brake parts. The factory number ZK-36003 identifies this specific set, signifying its precise manufacturing standards and quality assurance that you can trust.

When it comes to selecting the best brake pad brand, this Disc Brake Pad Set stands out for its blend of durability, reliability, and performance. It is crafted with advanced materials that not only provide excellent friction but also generate minimal noise and dust. This makes them a preferred choice for drivers who want good ceramic brake pads that offer a quieter and cleaner braking experience without compromising on stopping power.

Good ceramic brake pads are highly sought after for their ability to withstand high temperatures and resist wear, which translates to longer service intervals and fewer replacements. This set embodies these characteristics, making it a cost-effective investment for those who prioritize safety and performance. Additionally, ceramic brake pads tend to be gentler on brake rotors, which helps in maintaining the overall health of your braking system and reducing maintenance costs over time.

Whether you are a daily commuter or an enthusiast who demands the best from your vehicle, choosing the right brake pads is crucial. This Disc Brake Pad Set from the best brake pad brand ensures you get the perfect combination of strength, durability, and performance. Its OE replacement capability means you do not have to worry about compatibility issues or installation difficulties, making it a hassle-free upgrade for your vehicle's braking system.

In summary, this Disc Brake Pad Set is designed to deliver exceptional braking performance with a friction coefficient of 0.35, tailored specifically for the TKO braking system. The set contains 4 pieces, providing a complete solution for your brake pad replacement needs. Recognized by the factory number ZK-36003, it guarantees quality and reliability. With its reputation as part of the best brake pad brand, and offering good ceramic brake pads qualities, this product ensures safety, durability, and comfort on every drive. Upgrade your vehicle's braking system today with this premium Disc Brake Pad Set and experience the confidence that comes with superior stopping power.

Features:

High-quality disc brake pads designed for optimal performance

Ceramic brake pad material for reduced noise and enhanced durability

Includes shims for easy installation and noise reduction

Package contains 4 brake pads, suitable for both front and rear placement on vehicle

Chamfered edges to minimize brake noise and improve bedding-in process

Standard size compatible with most vehicles

Trusted as the best brake pad brand for safety and reliability

Technical Parameters:

| | |
|-------------------------|------------------|
| Quantity | 4 Pieces Per Set |
| Warranty | 12 Months |
| Factory No | ZK-36003 |
| OEM | 4252.18 |
| Chamfered | Yes |
| Braking System | TKO |
| Placement On Vehicle | Front And Rear |
| Interchange Part Number | D1293 D1222 |
| Package Contents | 4 Brake Pads |
| Model | Buick Firstland |

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is an exceptional choice for vehicle owners seeking reliable and high-performance braking solutions. Manufactured in China, these brake pads are designed specifically for the Buick Firstland, ensuring a perfect fit and seamless integration with the vehicle's braking system. As an OE replacement, this set guarantees compatibility and meets the rigorous standards set by the original equipment manufacturer, providing drivers with confidence in both safety and performance.

One of the standout features of the ZKZB Disc Brake Pad Set is its use of the best brake pad material, which ensures superior friction, durability, and heat dissipation. This high-quality material enhances braking efficiency, reducing stopping distances and improving overall vehicle control. Whether you are navigating busy city streets or cruising on highways, these brake pads deliver consistent performance in various driving conditions.

The black-colored brake pads come in a package containing four pads, making it an ideal solution for a complete disc brake replacement. Additionally, the chamfered design of each pad helps minimize noise and vibration during braking, contributing to a smoother and quieter ride. This thoughtful engineering detail is particularly beneficial for drivers who prioritize comfort alongside safety.

These OEM brake pads are perfect for multiple application occasions and scenarios. For everyday commuting, the ZKZB brake pads provide reliable stopping power and long-lasting wear, reducing the frequency of replacements and maintenance costs. For drivers who enjoy weekend road trips or require dependable braking during heavy traffic, these pads offer the resilience and responsiveness needed for varied driving demands.

In more demanding scenarios, such as driving in wet or hilly environments, the best brake pad material used in the ZKZB set ensures consistent performance and safety. The pads are engineered to withstand different weather conditions, making them suitable for both urban and rural settings. Whether it's sudden braking in an emergency or gradual slowing on downhill stretches, this disc brake pad set provides the confidence every driver needs.

In summary, the ZKZB Disc Brake Pad Set ZK-11011 is an excellent choice for Buick Firstland owners seeking high-quality, OEM brake pads. Its combination of the best brake pad material, precise chamfering, and compatibility with the original braking system makes it suitable for a wide range of driving occasions and scenarios. This product not only enhances vehicle safety but also improves driving comfort and reliability, making it a smart investment for any conscientious driver.

Customization:

Our ZKZB disc brake pad set, model number ZK-11011, is designed with precision in China to fit both the front and rear placement on your vehicle. Featuring a TKO braking system compatibility and standard size, these brake pads are chamfered for enhanced performance and reduced noise. Manufactured under factory number ZK-36003, this set ensures reliable braking power and durability. For optimal installation and maintenance, we recommend using the appropriate brake pad tool. Experience the benefits of the best ceramic brake pads with ZKZB's premium disc brake pad set.

Support and Services:

Our Disc Brake Pad Set is designed to provide superior stopping power and enhanced durability for a wide range of vehicles. To ensure optimal performance, it is important to follow proper installation and maintenance procedures.

Before installation, clean the brake caliper and rotor surfaces thoroughly to remove any dirt or debris. Always replace brake pads in pairs to maintain balanced braking performance.

During installation, avoid touching the friction surface of the brake pads to prevent contamination. After installing the new brake pads, perform a bedding-in process by gradually applying the brakes at moderate speeds to allow the pads to conform to the rotor surface. Regular inspection of the brake pads is recommended to monitor wear levels and ensure safety. Replace the brake pads if the thickness is below the manufacturer's minimum specification or if you notice any cracking, glazing, or uneven wear.

If you experience any unusual noises, vibrations, or reduced braking efficiency, please consult a professional technician for a thorough inspection and service.

For optimal brake system performance, use only compatible brake components and adhere to the vehicle manufacturer's guidelines and specifications.
