### Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

### Product Specification

- Slotted: Yes
- Type: Brake Pad
- Dimensions: 120mm X 50mm X 15mm
- Factory No: ZK-23008
- Quantity: 4 Pads Per Set
- Brake Type: Disc Brakes
- Brakeperformance: Excellent Stopping Power
- Material: Semi-metallic

### Product Description:

The Disc Brake Pad Set, Factory No: ZK-23008, is an exceptional choice for anyone seeking reliable and high-performance braking components for their vehicle. Engineered to deliver excellent stopping power, this set ensures safety and confidence on the road, whether you're driving in city traffic or tackling more demanding conditions. The brake pads are crafted from premium semi-metallic material, which offers an optimal balance between durability, heat dissipation, and noise reduction, making them a versatile option for a wide range of vehicles.

One of the standout features of this Disc Brake Pad Set is its superior brake performance. With excellent stopping power, these pads provide consistent and responsive braking, allowing you to bring your vehicle to a safe stop quickly and smoothly. This is particularly important in emergency situations where every fraction of a second counts. The semi-metallic composition of the pads enhances their ability to withstand high temperatures and resist wear, ensuring long-lasting performance and reliability over time.

Included in the package is 1 set containing 4 pieces, designed to replace the brake pads on both wheels of an axle. This convenient quantity means you have everything needed to maintain balanced braking on your vehicle, contributing to overall safety and control. Whether you are a professional mechanic or a DIY enthusiast, this set provides a straightforward solution for upgrading or replacing your existing brake pads.

In addition to the high-quality materials and performance, this Disc Brake Pad Set is compatible with interchange part numbers D1293 and D1222. This compatibility makes it easier to find the right fit for your vehicle and ensures seamless integration with your braking system. It also simplifies the process of sourcing replacement parts, as you can confidently match this set with your vehicle's requirements based on these well-known part numbers.

While this set uses semi-metallic material, it is important to note the advantages of ceramic brake pads as a point of comparison. Ceramic brake pads are known for their quieter operation and lower dust production. However, semi-metallic pads like the ones in this set provide superior heat resistance and braking power, making them an excellent choice for drivers who prioritize performance under demanding conditions. Many drivers and professionals consider this Disc Brake Pad Set to be among the best brake pad brands available, thanks to its blend of quality, durability, and effective braking capabilities.

For those looking to perform brake maintenance or replacements, having the right brake pad tool is essential. Proper tools ensure that the brake pads are installed correctly and safely, preventing damage to the braking system and ensuring optimal performance. Pairing this Disc Brake Pad Set with a reliable brake pad tool will make the installation process smoother and more efficient, helping you get back on the road with confidence.

In summary, the Disc Brake Pad Set Factory No: ZK-23008 offers excellent stopping power through its semi-metallic construction, packaged conveniently as a set of 4 pieces. Compatible with interchange part numbers D1293 and D1222, it is a versatile and dependable choice for a wide range of vehicles. Recognized as part of the best brake pad brand lineup, it balances performance, durability, and safety. Whether you are upgrading your braking system or replacing worn pads, this set, when used alongside the proper brake pad tool, will provide you with reliable and effective braking performance for miles to come.

### Features:

- Product Name: Disc Brake Pad Set
- Dimensions: 120mm X 50mm X 15mm
- Slotted design for enhanced heat dissipation and performance
- OEM Number: 95025848
- Color: Black
- Interchange Part Numbers: D1293, D1222
- Compatible with brake pad tool for easy installation
- Made from the best ceramic brake pads material for long-lasting durability
- High-quality ceramic brake pads providing superior stopping power and reduced noise

### Technical Parameters:

Slotted	Yes
Color	Black
Material	Semi-metallic
Factory No	ZK-23008
Quantity	4 Pads Per Set
Brake Type	Disc Brakes
Package Quantity	1 Set (4 Pieces)
Interchange Part Number	D1293 D1222
OEM	95025848
Brake Performance	Excellent Stopping Power

### Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is an exceptional choice for a wide range of driving occasions and scenarios...

Manufactured in China, this set features four high-quality black ceramic brake pads, known for their durability and superior performance. As a product from the best brake pad brand ZKZB, these pads are designed to deliver excellent stopping power, ensuring safety and reliability in various driving conditions.

One of the key advantages of the ZKZB ZK-11011 brake pads is their slotted design, which enhances heat dissipation and reduces brake fade during prolonged use. This makes them ideal for both everyday commuting and more demanding situations such as city driving with frequent stops, highway cruising, or even spirited driving in mountainous terrains. The ceramic brake pads provide quieter braking and less dust compared to traditional organic pads, making them perfect for drivers who value both performance and cleanliness.

These brake pads are well-suited for use in passenger cars, SUVs, and light trucks where reliable braking performance is critical.

Whether you are navigating busy urban streets, making sudden stops in traffic, or embarking on long road trips, the ZKZB Disc Brake Pad Set delivers consistent and smooth braking response. The excellent stopping power ensures confidence behind the wheel, reducing stopping distances and enhancing overall safety.

Additionally, the ZKZB ZK-11011 pads are interchangeable with parts numbered D1293 and D1222, making them a versatile replacement option for a variety of vehicle models. This interchangeability, combined with the best brake pad material used in their construction, positions these pads as a cost-effective and high-performance upgrade over standard brake components.

In summary, the ZKZB Disc Brake Pad Set with ceramic brake pads is perfectly suited for drivers seeking the best brake pad brand and material for dependable, quiet, and efficient braking. Whether for daily driving, weekend adventures, or challenging road conditions, these pads provide the excellent stopping power and durability required to keep your vehicle safe and performing at its best.
