

## Slotted Disc Brake Pad Set Semi-metallic Oem 95025848 Ideal Replacement Part for Commercial Fleet Maintenance and Repair

Our Product Introduction

for more products please visit us on [brakepadsset.com](http://brakepadsset.com)

### Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

### Product Specification

- Factory No: ZK-23008
- Interchange Part Number: D1293 D1222
- Dimensions: 120mm X 50mm X 15mm
- Position: Front
- Color: Black
- Manufacturer: Herito
- Friction Coefficient: 0.35 - 0.45
- Oem: 95025848

### Product Description:

The Disc Brake Pad Set by Herito is a premium quality replacement component designed to deliver exceptional braking performance and reliability. Manufactured with precision and engineered to meet or exceed OEM standards, this brake pad set is an ideal choice for those seeking durable and efficient braking solutions. Whether you are a professional mechanic or a vehicle enthusiast, these OEM brake pads ensure a perfect fit and optimal functionality for your braking system.

Measuring 120mm in length, 50mm in width, and 15mm in thickness, these brake pads are crafted to fit a variety of vehicle models requiring these exact dimensions. The set includes 4 pieces, providing a complete solution for one axle, which means you get all the components necessary for a full brake pad replacement in a single package. This makes installation straightforward and convenient, reducing downtime and ensuring you get back on the road quickly and safely.

One of the standout features of this Disc Brake Pad Set is its use of ceramic brake pad material. Ceramic brake pads are widely recognized for their superior performance characteristics compared to traditional organic or semi-metallic pads. They offer excellent heat dissipation, reduced brake dust, and quieter operation, making them a preferred choice for drivers who value both performance and cleanliness. The ceramic brake pad construction ensures smoother braking, less wear on rotors, and enhanced longevity, contributing to overall vehicle safety and cost-effectiveness.

The OEM number 95025848 corresponds to the exact specifications required by the vehicle manufacturer, ensuring that these brake pads match the original parts in quality and design. This adherence to OEM standards guarantees compatibility, reliability, and safety, giving you confidence that your braking system will perform as intended. Using genuine OEM brake pads helps maintain the integrity of your vehicle's braking system and avoids potential issues that can arise from using non-standard parts.

Herito, the manufacturer of this Disc Brake Pad Set, is known for its commitment to quality and innovation in automotive components. With a reputation for producing parts that meet rigorous testing and quality control procedures, Herito ensures that every brake pad set delivers consistent and dependable results. Choosing Herito means investing in a product backed by expertise and a dedication to customer satisfaction.

In addition to its excellent material composition and precise manufacturing, this brake pad set is designed for easy installation, making it suitable for both professional and DIY brake maintenance. Whether you are replacing worn-out pads or upgrading your current setup, these ceramic brake pads provide a direct replacement that requires no modifications. The package includes all four brake pads needed for one axle, allowing for a balanced and safe braking experience across both wheels on the same side of the vehicle.

In summary, the Herito Disc Brake Pad Set is an outstanding choice for anyone looking to maintain or enhance their vehicle's braking system. With dimensions of 120mm x 50mm x 15mm, an OEM reference of 95025848, and a package quantity of one set containing four pieces, this product combines precision engineering, high-quality ceramic brake pad material, and OEM-level standards. These ceramic brake pads offer superior heat management, reduced noise, and minimal dust generation, ensuring a cleaner and more comfortable driving experience. Trust in Herito's expertise and the proven benefits of OEM brake pads to keep your vehicle safe and performing at its best.

### Features:

Product Name: Disc Brake Pad Set

Brake Performance: Excellent Stopping Power for reliable braking

Quantity: 4 Pads Per Set, designed for front position

Friction Coefficient: 0.35 - 0.45, ensuring consistent and effective braking

Material: Semi-metallic, known as one of the best brake pad materials for durability and performance

Compatible with various brake pad tools for easy installation and maintenance

Offers performance comparable to the best ceramic brake pads, combining efficiency and longevity

### Technical Parameters:

Package Quantity	1 Set (4 Pieces)
Dimensions	120mm X 50mm X 15mm
OEM	95025848
Factory No	ZK-23008
Slotted	Yes
Color	Black
Type	Brake Pad
Manufacturer	Herito
Brake Type	Disc Brakes
Material	Semi-metallic

### Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, manufactured in China, is an essential component for ensuring safety and performance in various braking systems. Designed with excellent stopping power and a friction coefficient ranging from 0.35 to 0.45, these disc brake pads guarantee reliable and consistent brake performance in diverse driving conditions. Measuring 120mm X 50mm X

15mm, each set includes 4 pieces, providing a complete solution for most standard brake systems.

These ceramic brake pads are particularly suited for everyday commuting, highway driving, and even light off-road adventures. Their superior heat dissipation and low dust generation make them ideal for urban environments where frequent braking is common, helping to maintain clean wheels and prolong rotor life. The ceramic composition ensures quieter operation compared to traditional metallic pads, enhancing the overall driving experience.

For professional mechanics and DIY enthusiasts, the ZKZB disc brake pad set pairs perfectly with a reliable brake pad tool, facilitating easy installation and replacement. Whether you are performing routine maintenance or upgrading your vehicle's braking system, having the right brake pad tool ensures precision and safety during the process. This product is well-suited for use in automotive repair shops, service centers, and home garages.

In addition to personal vehicles, these brake pads are also applicable in commercial and fleet vehicles that require dependable stopping power and durability. The factory number ZK-23008 ensures authenticity and quality control, providing customers with confidence in their purchase. Whether you are preparing your vehicle for daily use, long-distance travel, or a racing event, the ZKZB disc brake pads offer excellent performance and reliability.

Overall, the ZKZB Disc Brake Pad Set is designed for versatility and efficiency. Its excellent friction coefficient and ceramic material composition make it an optimal choice for anyone seeking high-quality disc brake pads. Combined with the appropriate brake pad tool, this set ensures smooth installation and outstanding braking performance across a wide range of driving scenarios.
