

Disc Brakes Semi metallic Disc Brake Pad Set No ZK 23008 Optimized Brake Pads for Consistent Stopping Power in Industrial

Our Product Introduction

for more products please visit us on brakepadsset.com

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

Product Specification

- Interchange Part Number: D1293 D1222
- Brake Type: Disc Brakes
- Slotted: Yes
- Package Quantity: 1 Set (4 Pieces)
- Material: Semi-metallic
- Factory No: ZK-23008
- Position: Front
- Brakeperformance: Excellent Stopping Power

Product Description:

The Disc Brake Pad Set is engineered to deliver exceptional braking performance and reliability, making it an essential component for any vehicle equipped with disc brakes. Designed with precision and manufactured using high-quality materials, these brake pads provide a superior friction coefficient ranging between 0.35 and 0.45. This range ensures consistent stopping power, optimal safety, and enhanced control under various driving conditions, whether in city traffic or on winding roads.

As a brake pad type specifically designed for disc brakes, this product fits seamlessly into your vehicle's braking system, ensuring smooth and efficient operation. The black color of the pads not only contributes to a sleek and professional appearance but also indicates the use of advanced materials that resist wear and heat effectively. This attribute is crucial for maintaining long-lasting performance and reducing the frequency of replacements, ultimately offering excellent value for money.

One of the standout features of this Disc Brake Pad Set is its compatibility with interchange part numbers D1293 and D1222, making it a versatile choice for a wide range of vehicles. This interchangeability ensures that you can confidently replace your worn-out brake pads without worrying about fitment issues or compromising your vehicle's braking efficiency. Whether you are performing routine maintenance or upgrading your braking components, this brake pad set offers a reliable and hassle-free solution.

When it comes to brake pads, selecting the best brake pad material is critical for ensuring safety, durability, and performance. This Disc Brake Pad Set is made from premium compounds that meet or exceed OEM brake pads standards, ensuring that you receive a product that matches or surpasses the quality of original equipment manufacturer parts. This adherence to high standards means you can trust these pads to deliver consistent braking power, reduced noise, and minimal dust generation, enhancing both the driving experience and the longevity of your braking system.

In addition to material quality, the best brake pad brand reputation plays a significant role in the confidence drivers have when choosing replacement parts. This Disc Brake Pad Set represents one of the best brake pad brands in the market, known for rigorous testing, innovative design, and exceptional customer satisfaction. Choosing a product from such a reputable brand means you benefit from cutting-edge technology and thorough quality control processes that ensure safety and performance on every journey.

Furthermore, the brake pads' friction coefficient of 0.35 to 0.45 is optimized to provide a balanced combination of stopping power and pad longevity. This friction range is ideal for everyday driving and more demanding scenarios, offering reliable braking without excessive wear or overheating. It also helps maintain rotor integrity, reducing the risk of damage and the need for costly repairs. The well-engineered friction characteristics contribute to a quieter braking experience, minimizing the unpleasant squeals often associated with inferior brake pads.

In summary, the Disc Brake Pad Set is a premium choice for anyone seeking dependable and high-performing brake pads for disc brake systems. Its excellent friction coefficient, OEM-level quality, compatibility with popular interchange part numbers, and association with the best brake pad brand make it an outstanding product. Whether you are a professional mechanic or a vehicle owner who values safety and performance, these brake pads are designed to meet your needs and exceed your expectations, ensuring peace of mind on every drive.

Features:

- Product Name: Disc Brake Pad Set -----
- Manufacturer: Herito
- Color: Black
- Material: Semi-metallic, known as the best brake pad material for durability and performance
- Dimensions: 120mm X 50mm X 15mm
- Interchange Part Number: D1293, D1222
- High-quality OEM brake pads ensuring reliable and consistent braking performance
- Designed specifically as disc brake pads for optimal fit and function

Technical Parameters:

Material -----	Semi-metallic (best brake pad material) -----
Package Quantity	1 Set (4 Pieces)
Slotted	Yes
Quantity	4 Pads Per Set
Manufacturer	Herito
Friction Coefficient	0.35 - 0.45
Type	Brake Pad (disc brake pads)
Position	Front
Dimensions	120mm X 50mm X 15mm
Brake Performance	Excellent Stopping Power (best ceramic brake pads)

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, manufactured by Herito in China, is designed for optimal performance and reliability in various driving conditions. With a friction coefficient ranging from 0.35 to 0.45, these disc brake pads provide excellent stopping power and consistent braking performance. Each set includes 4 pads, ensuring a complete replacement for your vehicle's

braking system. These pads are compatible with interchange part numbers D1293 and D1222, making them a versatile choice for different car models.

These disc brake pads are ideal for everyday driving scenarios, including city commuting, highway cruising, and suburban travel. Whether you are navigating stop-and-go traffic or cruising at high speeds, the ZKZB brake pads deliver smooth and reliable braking. Their robust construction and high-quality materials make them suitable for both passenger cars and light trucks, offering enhanced safety and control in routine driving conditions.

For more demanding applications, such as mountainous terrain or frequent downhill driving, these brake pads excel by maintaining consistent friction and reducing brake fade. The best brake pad material used in the ZKZB Disc Brake Pad Set ensures durability and resistance to wear, which is crucial for drivers who require dependable braking performance during long trips or challenging routes. This makes them a preferred choice for adventure seekers and professional drivers alike.

Additionally, the ZKZB disc brake pads are well-suited for use in both dry and wet weather conditions, providing reliable stopping power regardless of environmental factors. Whether you are driving in rainy, snowy, or dusty environments, these pads maintain their effectiveness, contributing to safer driving experiences.

In summary, the ZKZB Disc Brake Pad Set offers versatile application occasions and scenarios, from daily commuting to demanding driving conditions. Its high friction coefficient, quality manufacturing under factory number ZK-23008, and compatibility with multiple part numbers make it a top choice for drivers seeking the best brake pad material for safety, durability, and performance.
