

Slotted ceramic brake pads 120mm X 60mm X 20mm designed for consistent performance under extreme temperature conditions

Our Product Introduction

for more products please visit us on brakepadsset.com

Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

Product Specification

- Thickness: 12 Mm
- Certifications: ISO 9001, ECE R90
- Numberofpads: 4
- Slotted: Yes
- Dimensions: 120mm X 60mm X 20mm
- Heat Resistant: Yes
- Wear Indicator: Included / Not Included
- Package Contents: 4 Brake Pads

Product Description:

Introducing the Disc Brake Pad Set specifically designed for the Mazda RX-8, a perfect blend of performance, durability, and safety. This set includes 4 high-quality brake pads engineered to deliver exceptional braking power and reliability under various driving conditions. Whether you're navigating city streets or taking on spirited weekend drives, these disc brake pads ensure your vehicle stops efficiently and smoothly every time.

One of the standout features of this brake pad set is its heat-resistant construction. Heat resistance is a critical attribute for brake pads, as braking generates significant heat that can degrade performance and lead to brake fade. These pads are engineered with advanced materials that withstand high temperatures, maintaining their integrity and braking efficiency even during intense or prolonged use. This makes them an ideal choice for drivers who demand consistent performance from their Mazda RX-8, whether in everyday commuting or more aggressive driving scenarios.

Measuring 50mm in width, these brake pads fit seamlessly into the disc brake system of the Mazda RX-8, ensuring optimal contact with the rotor and maximized stopping power. The precise fitment is crucial for maintaining the safety and responsiveness of the braking system, preventing issues such as uneven wear or excessive noise. With these pads installed, drivers can experience confident braking with minimal effort and maximum control.

When it comes to material, this product utilizes one of the best brake pad materials available on the market. The pads feature a ceramic brake pad formulation, which is renowned for its superior performance characteristics. Ceramic brake pads offer several advantages over traditional organic or semi-metallic pads, including quieter operation, reduced brake dust, and improved longevity. The ceramic composition ensures that these pads provide smooth and consistent braking performance while also being gentle on the brake rotors, helping extend the overall lifespan of your braking components.

The ceramic brake pad material also contributes to enhanced heat dissipation, which is vital for maintaining braking efficiency under demanding conditions. This helps prevent brake fade and ensures that the pads retain their stopping power even after repeated heavy braking. Additionally, ceramic pads tend to produce less dust, which keeps your wheels cleaner and reduces the need for frequent maintenance.

As a product type, these disc brake pads represent a critical component in the Mazda RX-8's braking system. Disc brake pads function by pressing firmly against the brake rotor to create the friction needed to slow down or stop the vehicle. The quality and material of the brake pads directly impact the vehicle's safety, performance, and driving experience. Choosing this set means investing in a product that prioritizes both your safety and driving enjoyment.

In summary, this Disc Brake Pad Set for the Mazda RX-8 combines a set of 4 expertly crafted pads with heat-resistant, ceramic brake pad material to deliver top-tier braking performance. The 50mm width ensures a perfect fit, while the advanced heat-resistant technology helps maintain consistent stopping power under all conditions. Whether you're looking to replace worn-out brake pads or upgrade your vehicle's braking system, this product offers the best brake pad material available to keep your Mazda RX-8 braking smoothly, quietly, and safely. Experience the confidence and peace of mind that come with using high-quality disc brake pads designed specifically for your vehicle's needs.

Features:

- Product Name: Disc Brake Pad Set
- Model: Mazda RX-8
- Slotted design for improved heat dissipation
- Certified with ISO 9001 and ECE R90 standards
- Width: 50mm for optimal fit
- Heat resistant construction ensures durability under high temperatures
- Made with high-quality ceramic brake pads for superior performance
- OEM brake pads equivalent for reliable and consistent braking
- Enhanced stopping power with ceramic brake pads technology

Technical Parameters:

Wear Indicator	Included / Not Included
Slotted	Yes
Dimensions	120mm X 60mm X 20mm
Certifications	ISO 9001, ECE R90
Thickness	12 Mm
Packing	Customized
Product Dimensions	5.5 X 5.5 X 3 Inches
Model	Mazda RX-8
Installation	Direct Replacement, No Modification Needed
Placement On Vehicle	Front And Rear

Applications:

The ZKZB Disc Brake Pad Set, model number ZK-11011, is designed to deliver exceptional braking performance across a wide range of applications and scenarios. Manufactured in China, these high-quality disc brake pads are engineered to provide reliable stopping power, making them an excellent choice for both everyday driving and more demanding conditions.

One of the primary application occasions for the ZKZB disc brake pads is routine vehicle maintenance and replacement. Whether you're performing a scheduled brake service or addressing worn-out pads, the ZK-11011 model offers a direct replacement solution that requires no modification during installation. This ensures a hassle-free upgrade or replacement process, saving time and effort for both professional mechanics and DIY enthusiasts.

These brake pads are particularly suitable for urban and highway driving, where smooth and consistent braking is essential. The good ceramic brake pads composition of the ZKZB set guarantees reduced brake dust, quieter operation, and enhanced durability compared to traditional organic or semi-metallic pads. This makes them ideal for drivers seeking the best ceramic brake pads that balance performance, longevity, and comfort.

In addition to standard passenger vehicles, the ZKZB disc brake pads are well-suited for light trucks and SUVs that require dependable stopping power under varied load conditions. Their dimensions of 120mm X 60mm X 20mm (5.5 X 5.5 X 3 inches) fit a broad range of brake systems, ensuring versatility in application.

For those concerned about safety and maintenance, the inclusion or exclusion of a wear indicator provides added convenience. When equipped, the wear indicator alerts drivers to the need for timely replacement, preventing brake failure and enhancing overall vehicle safety.

Moreover, these brake pads perform exceptionally well in diverse driving scenarios, including city stop-and-go traffic, aggressive driving, and even light off-road conditions. The ZKZB disc brake pads deliver consistent friction levels and heat dissipation, which reduce brake fade and improve control under stress.

In summary, the ZKZB model ZK-11011 disc brake pads are perfect for anyone looking for reliable, good ceramic brake pads that offer easy installation, superior performance, and long-lasting durability. Whether for daily commuting, weekend trips, or demanding driving conditions, these brake pads stand out as an excellent choice for maintaining optimal braking efficiency and safety.
